SUMMARY

Junior Full Stack Developer with 2 years of experience building and supporting web applications using React, Next.js, TypeScript, C#, .NET Core, MSSQL, and REST APIs. I'm strongest in debugging issues, working across frontend and backend code, collaborating clearly with teammates, and maintaining clean, reliable code in agile environments. I've used ChatGPT and GitHub Copilot to speed up development workflows, and I'm learning agentic AI through personal projects with a strong interest in rapid prototyping, automation, and building user-facing web experiences. I'm targeting a role where I can help turn ideas into functional applications quickly while continuing to grow in modern frontend development and AI-assisted product building.
